The Fire Extinguishers Range

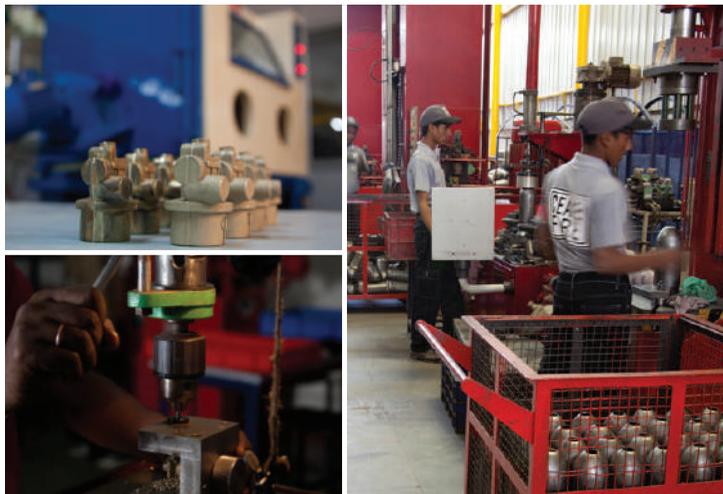

Ceasefire is ranked amongst the top fire safety brands in the Indian subcontinent.

Airports, aircraft, the Indian Railways, ISRO, ships, factories, warehouses, malls, stadiums, offices, cars, hospitals, schools, houses and Indian Army Ammunition Depots across the country are protected by Ceasefire.

And of course, millions of Indians who use these facilities.

In a market where many manufacturing units are little more than assembly operations, Ceasefire's products are deeply researched, quality-tested and engineered to perform to the highest standards. Manned by over 200 skilled and semi-skilled employees, our manufacturing unit is equipped for backward integration on virtually every component of an extinguisher, from its outer body to the tiniest valve. This means a greater cost to us, but the resulting quality is faultless.

Ceasefire designs products at the in-house Design Centre; and produces critical components at the hi-tech Ceasefire manufacturing unit in Dehradun, India.

An advanced MIG CO₂ welding station. A state-of-the-art paint shop for weather protection and seamless finish.

An in-house valve manufacturing unit. A world class deep draw machine equipped with advance hydraulics system.

And a testing lab where a battery of the most stringent in-ward and out-ward tests determine whether or not a product is fit to be sold.

Today, a Ceasefire product is sold every 60 seconds, and used in a real life fire emergency every 5 minutes.

We've never let anyone down.

6 minutes. That's all the time you have before a fire gets out of control. And the time you have to detect it, rush your family to safety and fight the fire. Packed with modern utilities, homes today have become extremely prone to fire. What's more, given the way our traffic conditions are today, chances are the fire department won't arrive on time to help. That's where Ceasefire's Home and Car fire extinguishers come in.

Features:

- Fights Class A, B, C and electrically started fires
- Portable, thus accessible
- Effective Discharge Mechanism
- World-class quality

Sizes available: 500 g and 1 kg

Agent: MAP 50, MAP 90 and HCFC 123

CERTIFICATIONS

CERTIFYING BODY

Fire needs oxygen to grow. Without it, even the largest fires die out in minutes. Ceasefire's Foam-based extinguisher exploits this weakness by creating a chemical foam that blankets the flames and cuts off the oxygen supply. It's what we like to call simple and effective firefighting.

Features:

- Fights Class A and B fires, and those involving flammable liquids
- State-of-the-art Pressure Gauge
- Controllable Discharge Mechanism
- Stored Pressure Technology for more effective firefighting
- Squeeze Grip Mechanism for quick and easy use

Sizes available:

Portable: 3 ltr, 6 ltr, 9 ltr
Wheeled Base: 60 ltr

Agent: Foam

STANDARDS

IS15683 EN3-7 & 8 PED

CERTIFICATIONS

CERTIFYING BODY

Short circuits in the electrical mains or in sensitive electronic equipment are the most common causes of home and office fires. Powder-based extinguishers can extinguish these, but they also cause serious collateral damage. Ceasefire's Clean Agent-based extinguisher is armed with a cutting-edge clean agent (HFC236fa, FE36, HFC227ea, HCFC123) which ensures the fire is put out and expensive equipment is rendered damage-free.

Features:

- Fights Class A, B and electrically started fires
- Zero damage and residue-free
- State-of-the-art Pressure Gauge
- Controllable Discharge Mechanism

Sizes available: 2 kg, 4 kg, 6 kg, 9 kg

Agent: HFC236fa, FE36, HFC227ea, HCFC123

WET CHEMICAL-BASED PORTABLE EXTINGUISHER

FIGHTS CLASS

A F ⚡

STANDARDS

EN3-7 & 8 PED

CERTIFICATIONS

CERTIFYING BODY

In commercial kitchens, the liberal use of fire and the presence of combustible substances make it easy for a fire to flare up. Designed to fight kitchen oil and fat fires, Ceasefire's Wet Chemical-based fire extinguisher uses an environmentally friendly foaming agent that blankets the flames, cuts off the supply of oxygen and cools the oil to below self-ignition point. Its de-greasing properties also ensure that the kitchen can be cleaned easily post a fire.

Features:

- Fights Class A, F and electrically started fires
- Almost 99% bio-degradable extinguishing agent
- Highly effective as it prevents re-ignition

Sizes available: 3 ltr, 6 ltr, 9 ltr

Agent: Wet Chemical

LAUNCHER (EXTINGUISHER + MODULAR SUPPRESSION SYSTEM)

FIGHTS CLASS

A B C ⚡

STANDARDS

PED

CERTIFICATIONS

CE 1128

CERTIFYING BODY

This one-of-a-kind extinguisher can be used to fight a fire manually, on auto-pilot when it senses a rise in temperature, or be launched into the flames. This makes it a revolutionary extinguisher that ensures no fire ever goes undetected or unaddressed. Its biggest pro, is that it eliminates the need for a firefighter to go anywhere near the fire. A huge benefit, especially in case of a large blaze.

Features:

- Fights A, B, C and E classes of fire
- Unique Discharge Mechanism
- Self-Actuation
- Quick and effective
- Two Heat Sensors
- Extinguisher + Modular Suppression System

Sizes available: 4 kg, 6 kg, 9 kg

Agent: MAP 90

CAFS (WATERMIST-BASED COMPRESSED AIR FOAM SYSTEM - LOW PRESSURE)

FIGHTS CLASS

A B ⚡

STANDARDS

PED

CERTIFICATIONS

CE 1128

CERTIFYING BODY

Water fights fire the best when it is completely vaporised. That's what Ceasefire's Compressed Air Foam System does. Using a specially designed Discharge Gun, it expels 80-micron sized droplets with a kinetic force strong enough to overcome the fire's own convection currents. The Watermist turns into steam, evaporates and stops the fire from spreading, without causing any flooding or collateral damage.

Features:

- Fights Class A, B and electrically started fires
- Dual phase extinguishing gun with an adjustable nozzle
- State-of-the-art Pressure Gauge
- Controllable discharge
- Thermal shock proof
- No collateral damage
- 6 years warranty

Sizes available: 9 ltr, 50 ltr

Agent: Watermist

Ceasefire Foammist Based extinguisher range, harness the combined power of the revolutionary watermist technology and foam in portable extinguishers. The foam-mist based firefighting system forms a foam blanket on top of the fire, thereby eliminating entry of oxygen and killing the fire instantly.

Features:

- Fights Class A, B, F and electrically started fires
- Automatic Discharge Mechanism
- State-of-the-art Pressure Gauge
- 6 years warranty

Sizes available: 2 ltr, 6 ltr

Agent: Telesolve

Ceasefire Accessories

CEASEFIRE INSTALERT

Even though spaces are armed with fire extinguishers, most of these fail to battle the flames in the event of a fire. Usually extinguishers are vandalised, misused or stolen. The answer doesn't lie in replacing or recharging them. What you need is a device that can protect the extinguisher 24x7. So that in the case of an emergency, the extinguisher works perfectly, puts out the flames and saves lives. Ceasefire's Instalert is one such tamper-proof device.

Features:

- Highly visible, compact design that's easily mountable
- Powerful 98dB warning alarm when activated
- Self-contained 9V DC alkaline power source
- Indestructible polycarbonate housing
- Remote powered 12V or 24V DC models

STROLLEY

Fires can happen anywhere and at any time. Which makes it important to install extinguishers in relevant places. But, what happens when a fire breaks out and the equipment is not easily accessible? Ceasefire presents the perfect accessory to mobilise your firefighting equipment. Our range of innovative fire extinguisher Strolleys are capable of carrying one or two extinguishers. Think of them as life savers on wheels.

Features:

- High quality construction for easy mobility
- Retractable handles
- Photo luminescent signs for visibility through smoke and darkness
- Powder-coated, rustproof bodies
- Can carry extinguishers weighing from 2 kg to 10 kg
- Available in single and double variants

ESCAPE SIGNAGE

Most fires are electrically started, and end up causing damage to electrical mains and wiring. Which means, at some point in a fire situation, the entire premises will be plunged into darkness. Between the inability to see and the noxious black smoke increasing there are chances of asphyxiation, people panic. Here, the single most important need of the hour is to evacuate as efficiently and quickly as possible. Ceasefire's fire safety signage, quite literally, shows you the way.

Escape Range:

- Fire safety signs
- Escape route signs
- Marking strips and low-level signage system
- Evacuation plans

Ceasefire Accessories

FIRE SUITS

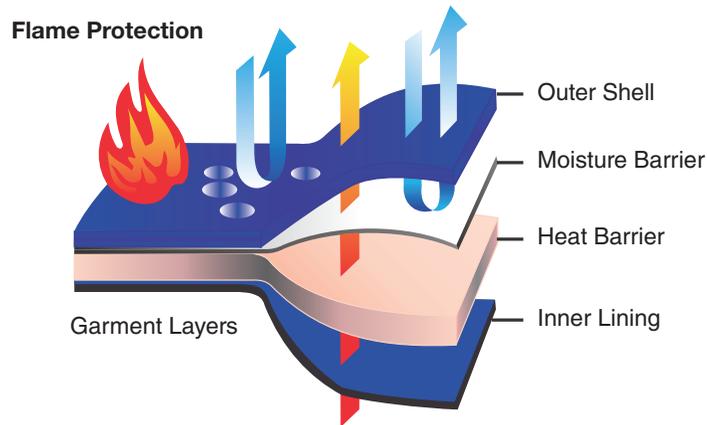

A blazing fire emits massive amounts of heat and smoke, making it dangerous, and at times, impossible to approach. This seriously hampers the ability to extinguish the fire. Which is precisely why, Ceasefire Fire Suits offer the protection required to get close enough to a fire, fight it effectively and avoid injury.

Features:

- High heat resistance; withstands heat at 1800°C for 5 minutes without any burning or melting and less than 5% shrinkage
- Limited inflammability
- 450N tensile strength, seam tensile strength and residual strength
- 25N tear strength
- Marked with strategically located fluorescent 3M reflective tapes

THREE CRITICAL ELEMENTS THAT GIVE CEASEFIRE FIRE & INDUSTRIAL SUITS A DEFINITE EDGE:

- Four layer protection
- International quality standards
- Tough heat-resistant fibre, namely Nomex, Kevlar and PBI Gold

POWER
Entry-level fire suits to tackle small and medium-sized fires.

ALUSTAR
Dual-mirror Kevlar fabric for proximity, bulk flammable liquids and flammable gas firefighting.

ARCSTAR
Designed to guard against the intense, destructive heat of electrical arcs.

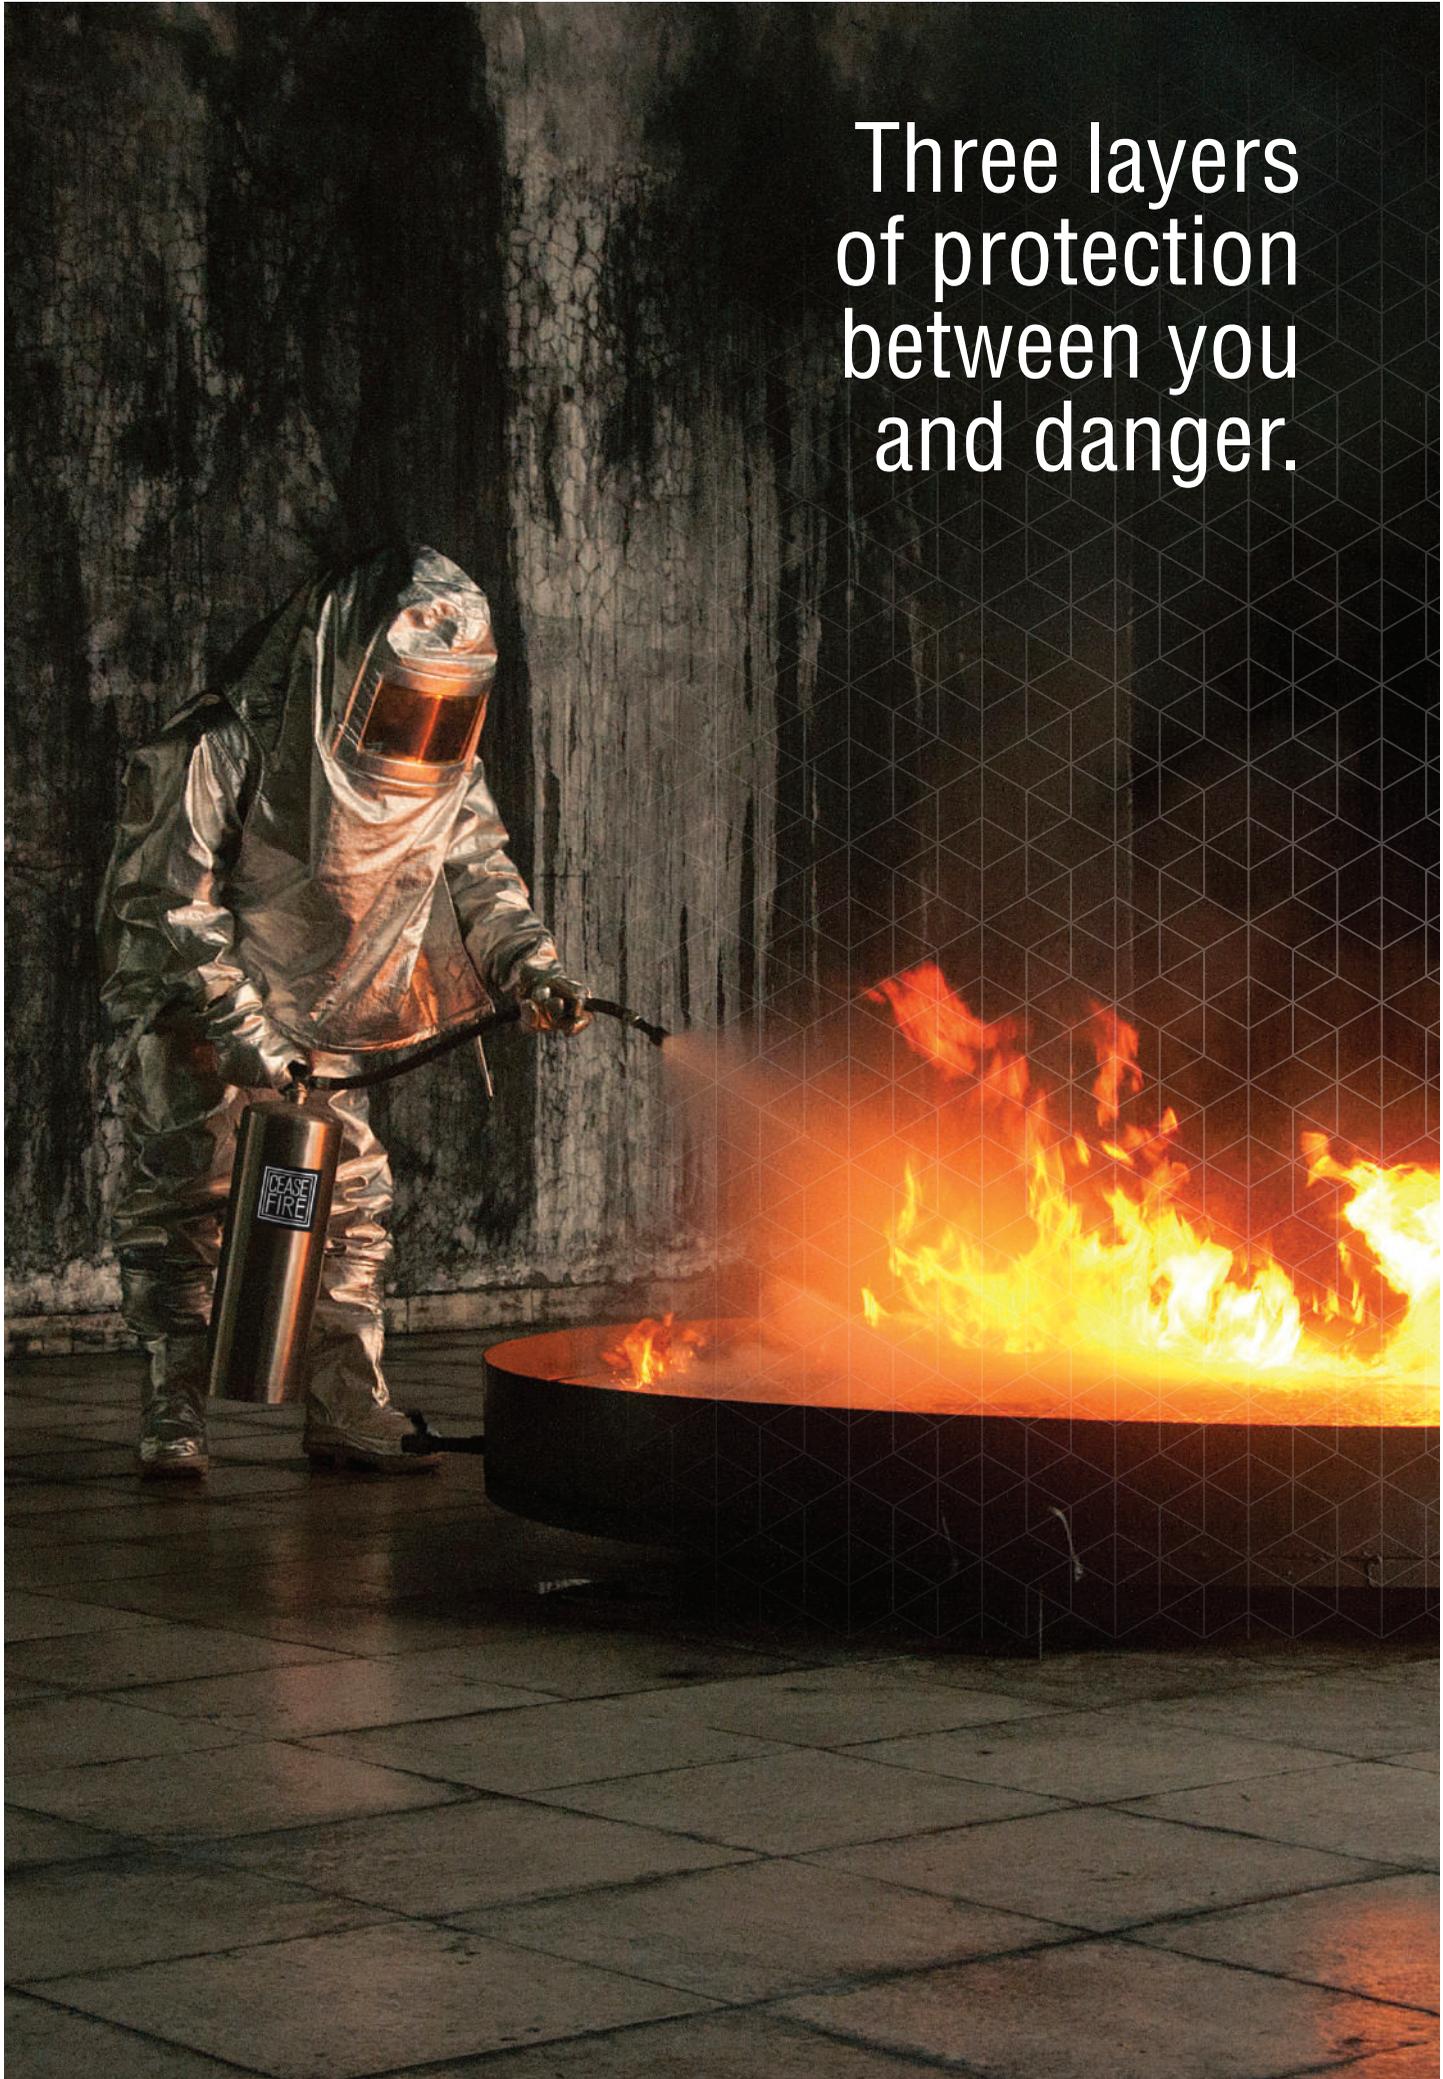

GOLDSTAR
High-end protective suits made of PBI Gold material.

METALSTAR
DuPont NOMEK MetalPro Plus, the perfect guard against industrial hazards.

Three layers
of protection
between you
and danger.
