

PRODUCT DATASHEET - INTELLIGENT OUTPUT MODULE (PLATE MOUNT)

INTELLI-SENSE

Addressable Device

TI-002219

DESCRIPTION

The Intelli-Sense module range provides an ideal solution to the monitoring and control requirements of most fire detection and alarm systems, ranging from small and simple, to large and complex. By utilising the fully digital communication protocol, reliable and fast operation is achieved even when employing the impressive 240 device loop capacity. A choice of mechanical configurations provides easy integration of the units into a variety of field locations. The TI-002219 is mounted on a standard faceplate and can be used with a surface back box or flush mounted and provides the capability to remotely control a single ancillary circuit using external power, whilst supervising the output wiring for fault conditions. Bi-colour LEDs provide local indication of device status.
